

The First Insight is cure state or recovery from Malaria happened between 2011 and 2014 in Kenya:

From that dashboard, I clicked on Kenya on the map, and this showed deaths due to malaria for each year from 2000 to 2014.

Before 2011, there deaths per year reached more than 50K deaths and were above Africa average deaths due to Malaria per year. After 2010, starting in 2011, deaths were gradually reduced below Africa deaths average due to Malaria per year.

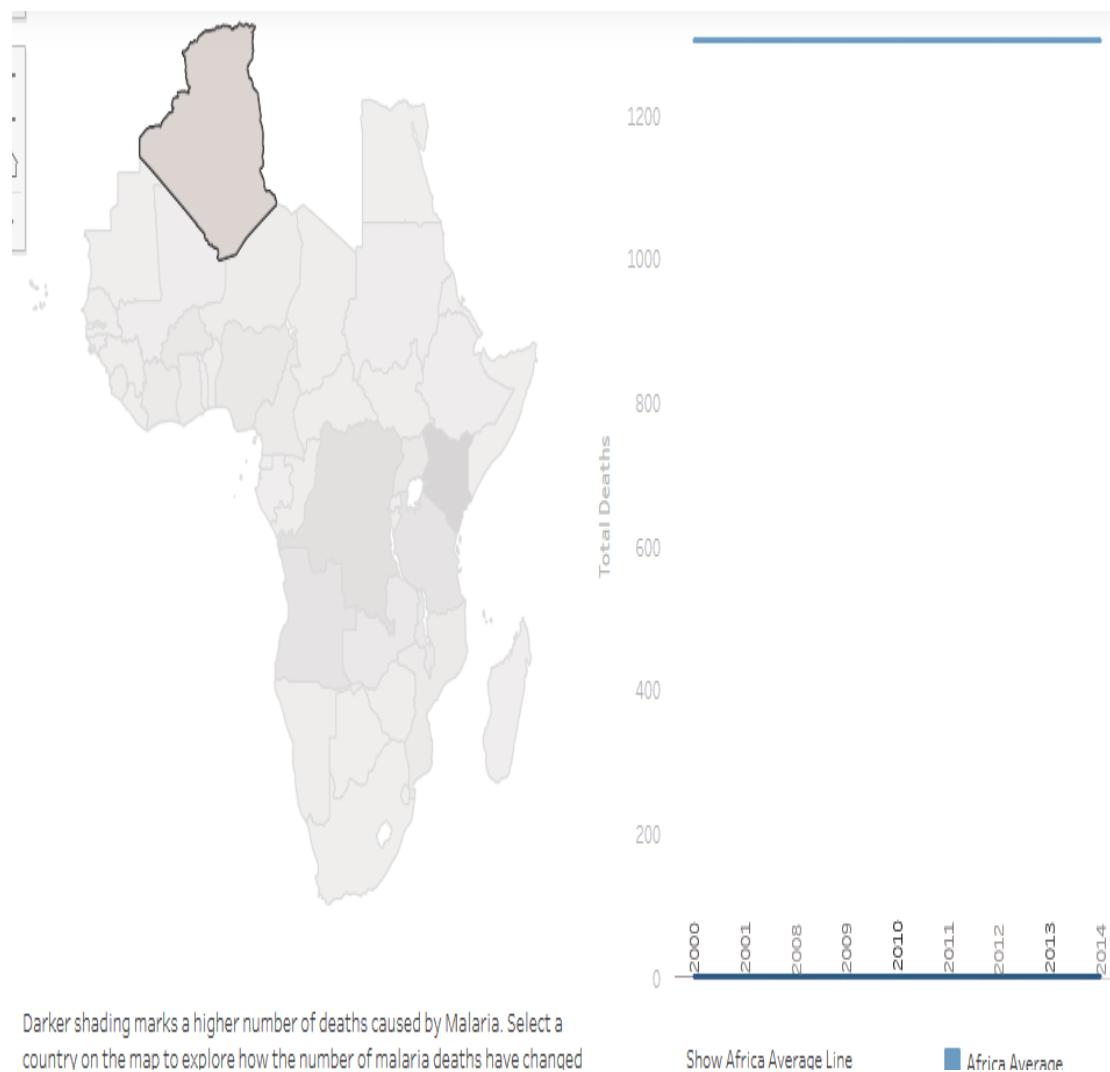

The Second Insight is Algeria were the cleanest country in Africa from Malaria between 2000 and 2014:

From that dashboard, I clicked on Algeria on the map and compare it with the rest of Africa countries regarding the Average number of deaths per year for each country of African Countries due to malaria from 2000 to 2014.

Clicking Algeria show me that The Average of deaths due Malaria per year were only one case for every year between 2000 and 2014.

Doing this for all countries, I found that Algeria has the least average number of deaths between 2000 and 2014 among Africa countries due to Malaria.

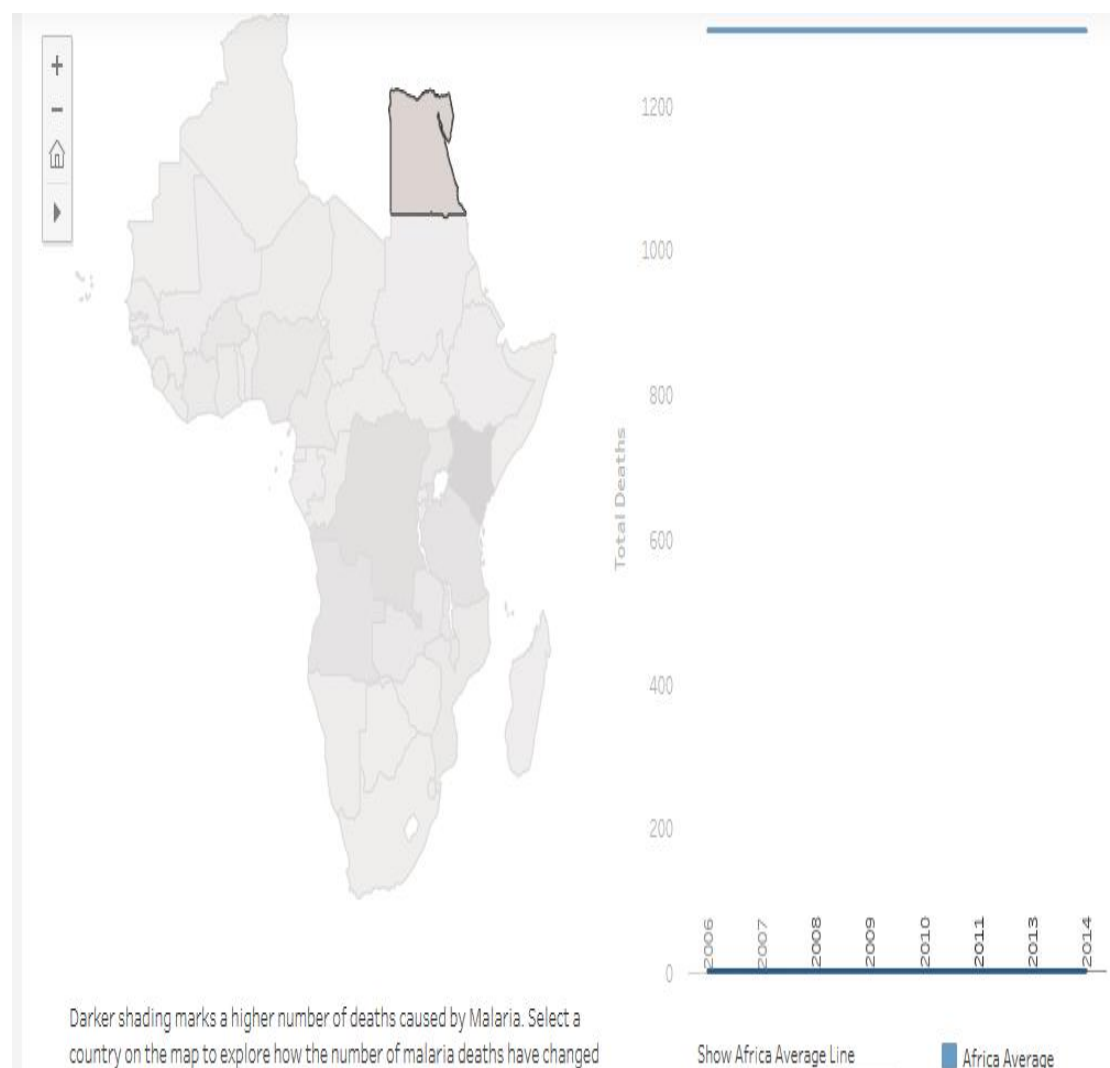

The Third Insight is Egypt were the Second cleanest country in Africa after Algeria from Malaria between 2000 and 2014:

From that dashboard, I clicked on Egypt on the map and compare it with the rest of Africa countries regarding the Average number of deaths per year for each country of African Countries due to malaria from 2000 to 2014.

Clicking Egypt show me that The Average of deaths due Malaria per year were only Two cases for every year between 2000 and 2014.

Doing this for all countries, I found that Egypt has the second least average number of deaths between 2000 and 2014 among Africa countries due to Malaria after Algeria.
